Solar Skies Mfg., LLC Launches New OG300 Certified Solar Water Heating Systems

Solar Skies received OG-300 System Certification and License from the Solar Rating and Certification Corporation (SRCC) for 35 solar water heating systems. The OG-300 certification is based on the successful design review and analytical evaluation of components meeting the standards specified by SRCC.

Federal and state incentives require an OG-300 certified system when installing a solar hot water package. By installing a Solar Skies OG-300 certified system, the customer is assured that the system they are investing in is in compliance with the requirements set forth by SRCC and will provide maximum performance.

The Solar Skies solar water heating system offers flat plate solar collectors, stainless steel or glass lined storage tanks, drain back tanks, a complete line of mounting hardware, installation kits and components for residential and commercial applications.

Solar Skies Mfg., LLC manufactures solar thermal collectors and distributes solar tanks and components for both residential and commercial use. The SRCC rated collectors and solar tanks are offered in a multiple of series and a wide range of sizes. For more information, contact Solar Skies at 106 Donovan Street, Alexandria, MN 56308; Telephone: 320-762-1151, Email: deb@solarskies.com, or visit www.solarskies.com.
